AHG Report on Font Format

m57702 - WG3 "MPEG Systems" (October 11-15, 2021)

October 11, 2021

Mandates

1. Review and discuss the revised text of ISO/IEC 14496-22:2019_CDAM2.
2. Explore potential future changes and updates, and propose new work items (if applicable) for consideration in the future new edition of the OFF specification.

Activities

- The CDAM2 document was published under ballot, AHG discussions were limited. However, technical discussions did take place and are captured as National Bodies comments. (The results of the CDAM ballot are uploaded as input document m57782 "Summary of Voting on ISO/IEC 14496-22:2019/CD Amd 2".)
- Exploratory GitHub discussions of future technology changes and updates are currently underway and the AHG expects that the results of the discussions will form a basis for the new OFF 5th edition work.

AHG Recommendations

- AHG recommends to accept technical comments submitted as part of the ballot responses and to promote the updated text of the ISO/IEC 14496-22 AMD2 to Draft International Standard.

Thank you!
